SUMMARY

I am an entry-level Cybersecurity professional with hands-on experience in CTF challenges and web application penetration testing. Certified as a CEH, I possess a solid grasp of OWASP Top 10 vulnerabilities alongside Linux and networking fundamentals. My practical expertise includes identifying and managing vulnerabilities, coupled with a commitment to continuous learning and improvement in cybersecurity practices

EXPERIENCE

Cybersecurity Intern

[SkillVertex](#)

Online

09/2023 - 10/2023

Online internship focusing on foundational cybersecurity skills

- Gained hands-on exposure to cybersecurity fundamentals including web application security and vulnerability assessment
- Practiced identifying OWASP Top 10 vulnerabilities such as SQL Injection, XSS, CSRF, and authentication flaws
- Used tools including Burp Suite, Nmap, and Nessus for lab-based testing and vulnerability analysis
- Documented findings and learned remediation best practices for identified vulnerabilities
- Strengthened understanding of Linux fundamentals, networking concepts, and security testing methodologies

PROJECTS

CTF Machines – TryHackMe / Hack The Box

09/2023

Hands-on labs simulating real-world attacks using CTF platforms

- Solved multiple CTF machines simulating real-world attack scenarios including web exploitation and Linux privilege escalation
- Performed enumeration using Nmap, directory brute-forcing, and service analysis
- Exploited vulnerabilities such as weak credentials, insecure configurations, SQL Injection, and file inclusion
- Achieved privilege escalation using SUID binaries, sudo misconfigurations, and kernel exploits
- Documented attack methodology and mitigation strategies

Web Application Penetration Testing Lab

09/2025

On PORTSWIGGERSACADEMY LAB

- Conducted manual and automated penetration testing on DVWA and OWASP Juice Shop
- Identified SQL Injection, XSS, CSRF, Broken Authentication, and Security Misconfigurations
- Prepared structured vulnerability assessment reports with CVSS scoring and remediation guidance

EDUCATION

Bachelor Of Technology

Panimalar Engineering College

Chennai, Tamil Nadu

08/2022 - 05/2026

- Artificial Intelligence & Machine Learning

SKILLS

Security Domains::

Web Application Security, Vulnerability Assessment, Threat Identification, OWASP Top 10, Privilege Escalation

Security Tools:

Burp Suite, Nmap, Metasploit, Nessus, Wireshark, Hydra

Web Exploitation:

SQL Injection, Server-Side Request Forgery, XSS, Cross-Site Request Forgery, Authentication & Access Control Flaws

Networking:

TCP/IP, DNS, HTTP/HTTPS, Network Enumeration

CERTIFICATIONS

CEHv12

EC-COUNCIL

UDEMY

Basic Of Ethical Hacking

TRYHACKME

Top 7% PLAYER

CSC DIPLOMA

Python, Java, C, C++
