SUMMARY

Final-year B.Tech (AI/ML) candidate leveraging advanced Machine Learning techniques to enhance Cybersecurity Defenses. Proven ability in Anomaly Analysis and Automated Incident Response. Seeking opportunities to apply analytical skills to Threat Detection and Web Penetration Testing in a dynamic security environment.

EXPERIENCE

Cyber Security Intern (Skill Vertex Company)

March 2024 - April 2024 Bengaluru, Karnataka

- Configured Snort IDS and developed custom rules to boost threat detection effectiveness.
- Conducted end-to-end security testing, including vulnerability assessments and penetration tests.
- Expertly utilized security tools such as Nmap, Nessus, Metasploit for monitoring and risk analysis.
- Reported security findings to leadership, facilitating risk mitigation and defense improvements.
- Performed Web Penetration Testing on over 30 web applications, utilizing the methodologies and hands-on environments provided by PortSwigger Academy and Labs.

PROJECT

CTF Machine

ShadowProtocol.co.in • tryhackme.com/jr/shakthimaan

March 2025 - April 2025, Chennai, Ambattur

- Designed and deployed a custom Capture the Flag (CTF) machine, incorporating diverse security challenges to test and enhance penetration testing skills.
- Developed multiple Capture the Flag (CTF) machines that engaged over 500 participants, featuring varied difficulty levels and innovative security scenarios to enhance cybersecurity skills.

This CTF machine is designed to ensure that every challenge on the site actively exercises core offensive security skills, including scanning, reconnaissance, analysis, exploitation, cryptography, problem solving, password cracking, and web penetration testing, giving participants an end-to-end penetration testing experience

Outfit Analyzer

Personal Project • github.com/Cybernextin/Outfit-Analyzer

January 2025 - March 2025 Chennai, Ambattur

- Developed an AI Outfit Analysis system using the Google Gemini API, achieving 95% accuracy for clothing detection.
- Boosted processing speed by 43% by optimizing the analysis workflow.
- Built a Flask-based web application with a responsive interface for image upload and visualization.
- Managed image scalability and secure storage by integrating cloud-based solutions.

EDUCATION

Bachelor Of Technology in Artificial Intelligence and Machine Learning

Panimalar Engineering College • Poonamallee, Chennai • 2026 • CGPA: 7.853

CERTIFICATIONS

CEH (Certified Ethical Hacker)

EC-Council 2024 - 2025

UDEMY Certificate

Core Cybersecurity Tool Proficiency • 2023

Advance Diploma in Python Programming (ADPP)

Diploma Certificate (CSC) • 2022

SKILLS

Penetration Testing - Metasploit Framework, Burp Suite, Nmap, Wireshark, SIEM, OWSAP top 10, etc.

Security Domains - Web, Network, Wireless exploitation and analysis

Programming Languages - Python, Java, SQL

Scripting & Automation - Bash, PowerShell (for security automation and red teaming)
